

Spartan Light Metal Products Announces Expansion Plans for Sparta Illinois Facility

Sparta, Illinois – Ground Breaking News

Ken Fehr, Vice President, Sparta Operations, Spartan Light Metal Products announces the expansion of the Sparta Illinois Facility. The expansion will consist of 90,000 square feet; designated primarily for shipping, receiving and warehousing. Spartan Light Metal Products targets February 2017 as a projected completion date.

City officials, community leaders, company management and plant employees will be on hand for the ground breaking ceremony on Thursday, May 5, 2016 at 10:30. “These are exciting times for us. We are very proud of the success of our employees and our company,” said Fehr.

Spartan Light Metal Products has been an industry leader in both aluminum and magnesium custom die castings for over five decades. Spartan's specialty is not just producing high quality castings; their scope of experience includes design, engineering assistance, and strict quality and process control for complex products. Spartan supplies to a wide range of manufacturers, from automobiles and trucks to power tools, electronic components and much more. The Sparta plant opened in 1961 and currently employs 650 team members.
